Re: Bustos Media of Oregon License, LLC
KGDD (AM), Oregon City, Oregon
Facility Identification Number: 2431
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed December 6, 2007, on behalf of Bustos Media of Oregon License, LLC ("BMO"). BMO requests further extension of the special temporary authority ("STA") granted on March 24, 2006, to operate Station KGDD with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, BMO states that it has completed technical adjustments necessitated by a tenant's removal of equipment from its tower; however, additional time is required due to the need to coordinate with the owners of several nearby towers. BMO states that it believes the matter can be resolved within 90 days.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ KGDD is licensed for operation on 1520 kHz with 50 kilowatts daytime and 15 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KGDD may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. BMO must notify the Commission when licensed operation is restored.² BMO must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 8, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
